DETAILED ACTION***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: The prior art, D'Andrade et al, teaches a toy vehicle having a rear cargo unit, a receiver, a drive motor and a steering motor. Prior art, Myers, teaches a toy vehicle having a plurality of circular receptacles attached to the vehicle. Prior art, Brovelli, teaches a toy vehicle having a plurality of circular receptacles attached to the toy vehicle and a plurality of spring assemblies each having a spring coupled to the bottom interior surface of each receptacle. However, the prior art mentioned above fails to teach the combination of the rear cargo unit, a plurality of circular receptacles attached to the rear cargo unit and a plurality of spring assemblies, each having a solenoid and a spring, said spring is coupled to the bottom interior surface of each receptacle for allowing the can to rest thereon and discharging the can upwardly into the air from the circular receptacle when the solenoid is energized, each solenoid is in communication with the receiver. The prior art also fails to teach each having a spring assembly, having a solenoid, a spring attached to the bottom surface of each receptacle, and a pin extending from the solenoid through the receptacle for holding the spring underneath the can of beer or soda, each solenoid in communication with the receiver and the method comprising the steps of actuating one of the can release buttons and propelling the can into the air by releasing the spring, by retracting the, by energizing the solenoid.
